

Ambassadors

Throughout our courses we identify energetic students and immunology pioneers who could become Immunopaedia Ambassadors. Our Ambassadors are innovative immunologists who work to spread the word about our website in their home countries and institutions.

We are proud to have members from across the world join our Immunopaedia team. You may view our Ambassadors by continent or by interview.

▪ Ambassador of the Month – 2017

What is an Immunopaedia Ambassador?

- Immunopaedia Ambassadors fulfill the current roles:
- Promote Immunopaedia at their host institution – spreading the word about the website at places like seminars and lectures.
- Identify and summarise ground-breaking and interesting immunology research articles and news to be posted on our “Breaking News”
- Interview leading immunology researchers – short video or written interviews.
- Contribute towards the scientific content for online courses
- Promote the Immunopaedia’s social networks

How do I become an Immunopaedia Ambassador?

If you’d like to join the Immunopaedia team and promote our website in your country and at your institute fill our [Contact Form](#) stating your intentions.

What are the benefits of becoming an Immunopaedia Ambassador?

- Your biosketch and photo will be included on an Ambassador page with links to your preferred online profiles eg. LinkedIn and ResearchGate profiles.
- You will contribute to the development of an Immunopaedia worldwide network.
- Participation in this initiative will involve meeting researchers working in various fields of immunology and

will foster your career development as a scientist.

- You could be featured in our monthly Newsletter
