Introduction to Immuno-Jaipur
A Snapshot of the Immune System
The Innate Immune System
MHC & Antigen Presentation
Overview of T Cell Subsets
gamma/delta T Cells
B Cell Activation and Plasma Cell Differentiation
Antibody Structure and Classes
Inflammation and autoinflammation
Central and Peripheral Tolerance
Autoimmunity and Chronic Inflammatory Diseases
Autoimmunity & Dysregulation
Novel Therapeutic strategies for Autoimmune Diseases
Strategies to apply gamma/delta T cells for Immunotherapy
Immune Responses to Cancer
Tumour Microenvironment
Cancer Immunotherapy
Origin and perspectives of CAR T cells
Metabolic checkpoints regulating immune responses
Transplantation
Primary Immunodeficiencies
Regulation of Immunity & the Microbiome
Growing up with Herpes virus
