Join the IUIS Education Committee (IUIS-EDU)

Build Immunology Without Borders: Shape the Future of Global Scientific Equity

Imagine helping a young immunologist design their first grant proposal, then watching them go on to lead a lab and train the next generation. That is the impact of the **IUIS Education Committee (IUIS-EDU)**, and we want **you** on the team.

We are a vibrant, hands-on network spanning the regional federations (EFIS, ALACI, FAIS, FIMSA and North America), united by one bold mission: to advance immunology training worldwide and close the gap for scientists in Low- and Middle-Income Countries (LMICs).

What You Will Do

- **Bring world-class courses where they matter most.** Co-create in-person courses in LMICs, built around regional disease priorities and local needs.
- **Build the scientists of tomorrow.** Pair cutting-edge science with practical training in grant writing, CV development and scientific publishing.
- **Spark connections that last a career.** Mentor course alumni, catalyse collaborations and help grow new immunology communities around the globe.

Learning That Starts Before Day One *and Never Stops*, Powered by Immunopaedia

Every IUIS-EDU course follows a “**flipped classroom**” model with **Immunopaedia** (immunopaedia.org.za), the IUIS-endorsed, open-access immunology learning platform that anyone can join for free.

BEFORE

6-Week Online Pre-Course

Participants arrive primed and ready, having worked through lectures, clinical case studies, key papers and quizzes built with course faculty.

DURING

Face-to-Face & Fully Interactive

With the foundations in place, time together goes on meet-the-speaker sessions, poster walks, grant writing and deep discussion.

AFTER

Learning That Lives On

Online courses, case studies and ongoing mentoring keep alumni learning, connected and growing long after they return home.

Your role: help shape this blended curriculum, contribute content in your area of expertise and bridge the online and in-person learning journey for every participant.

Call for Applications **Deadline: Nov 15th 2026**

Apply online

Who We Are Looking For

- **Immunologists who believe talent is everywhere**, but opportunity isn't, and are driven by equity, teaching and collaboration.
- **Researchers and educators** excited to shape course planning, participant selection, resource mobilization and online learning content.
- **Leaders ready to make a difference** over an initial three-year term as the vital bridge and liaison to their Regional Federation.

Ready to Make Immunology Without Borders a Reality?

Bring your expertise, energy and passion to a team that is transforming scientific education worldwide. **Apply today!**
